Record of Decision and Resource Management Plan for the Winnemucca District Planning Area, May 2015	NSO/NTL	NV-WD-CRNA-02 No Surface Occupancy in National Register of Historic Places sites No surface occupancy (NSO) in areas containing NRHP eligible, listed and unevaluated sites and TCPs. To accomplish this, any quarter-quarter-quarter section (10-acre parcel) within or intersected by the site would be subject to NSO. For development and production phases, surface occupancy may be limited to a specific distance or precluded at hot springs, pending conclusion of the National Historic Preservation Act (NHPA) requirements and Native American consultation process. Additional lands outside the designated boundaries of sites may be added to the NSO restriction to the extent necessary to protect values where the setting and integrity is critical to their designation or eligibility.	NSO: Potential NRHP eligible sites exist in T22N R27E Sec. 8(entire section), 20 (entire section), 30 (entire section), and 32 (entire section). NTL: For development and production phases, surface occupancy may be limited to a specific distance or precluded at hot springs, pending conclusion of the Native American consultation process. Notice to lessee applies to entire parcel. NTL: The Winnemucca District Resource Management Plan allows for the development of stipulations, use restrictions, mitigation measures and other management actions to protect traditional use areas and practices (RMP Action TC 2.4). Notice to lessee applies to entire parcel.

Record of Decision and Resource Management Plan for the Winnemucca District Planning Area, May 2015 Resource specified and the BLM Newada State Director and the Nevada State Director and the Nevada State Historic Preservation Office. The presence of National Register eligible, listed, and unevaluated sites will be determined on the basis of a literature review of recorded sites and properties in the proposed lease area.
